

# Caltech Pedestrian *Japan* Data

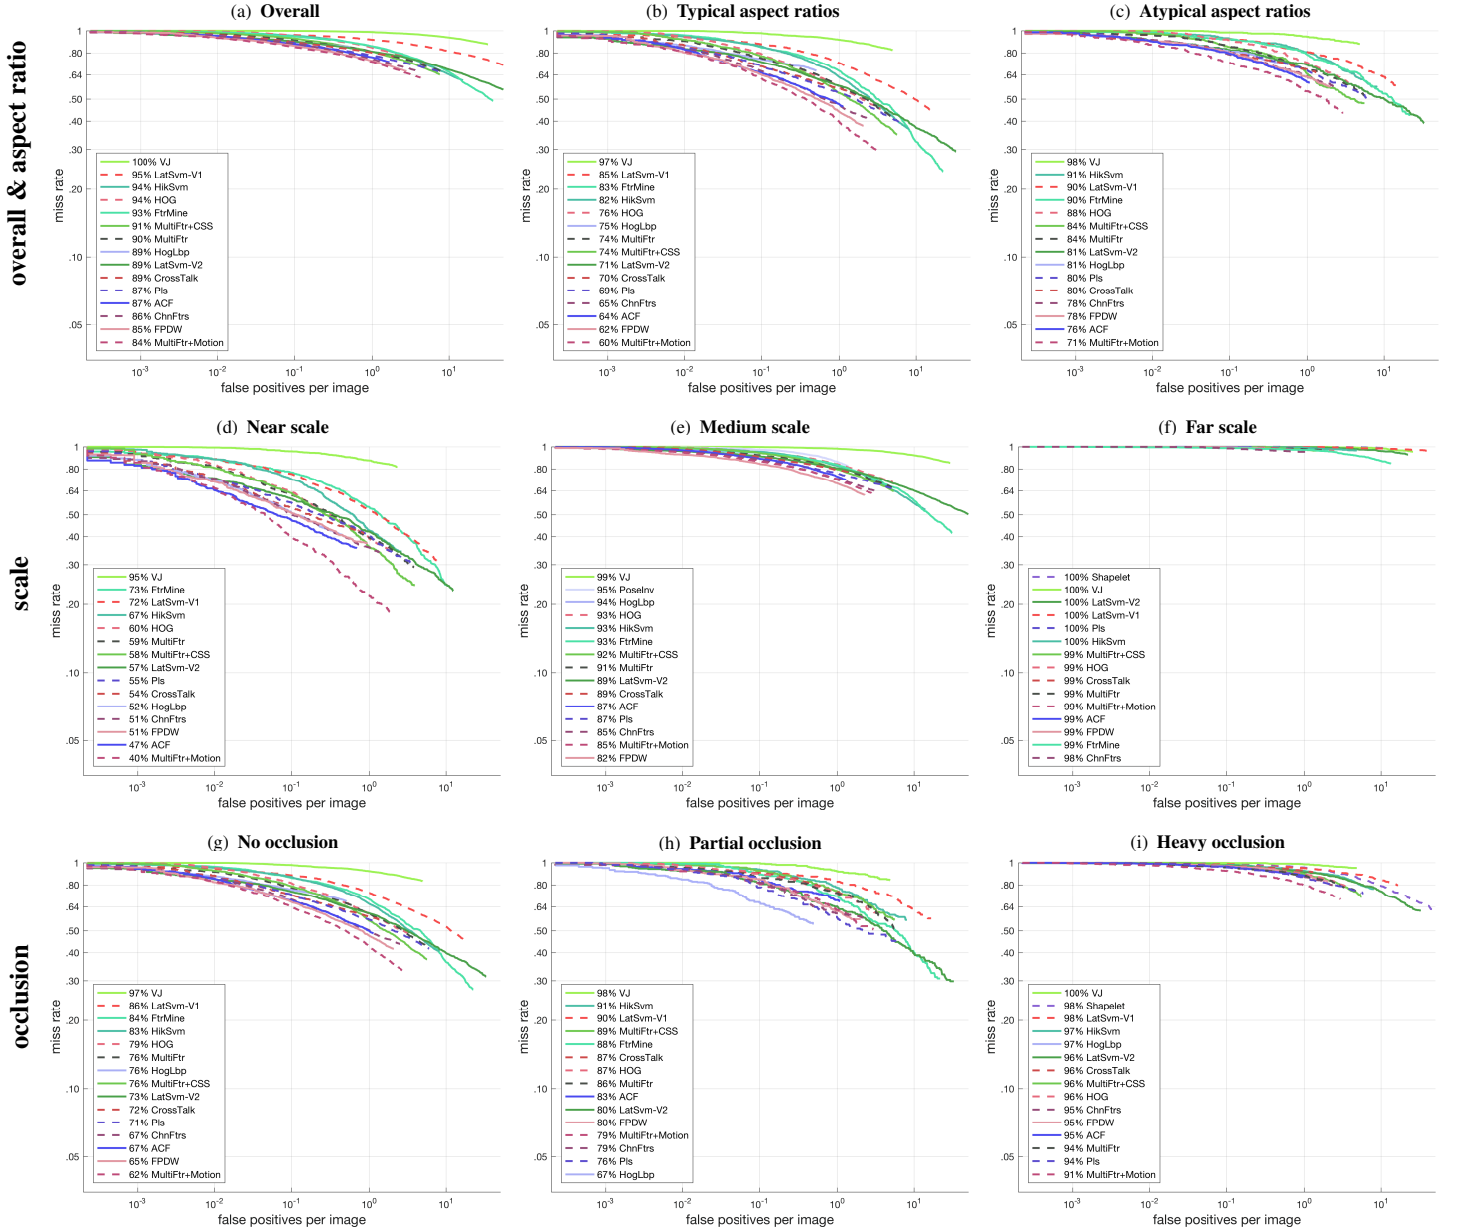

Figure 1: Miss rates versus false positive per-image curves shown for various subsets of the data. Lower curves indicate better performance; the log-average miss rate for each detector is shown in plot legends. (a) Overall performance on the entire dataset. (b-c) Performance w.r.t. aspect ratio (computed for unoccluded pedestrians 50 pixels or taller). (d-f): Performance w.r.t. scale (computed for unoccluded pedestrians). (g-i): Performance under varying levels of occlusion (computed for pedestrians 50 pixels or taller).
